Commissioners Refuse Application to Utilize Portion of Right of Way, Roads Being Too Narrow to Permit of Use

Mr. Hall requested the Board to give his company the right to use twelve or fourteen feet of the county highway right of way on the east and west sides of the roads running from the Orange County line to Kissimmee and from Kissimmee, through St. Cloud, to the Alford County line. He was of the opinion that all the county roads had a right of way of forty feet. He stated that the work to be done by the interurban company

With this explanation the request of the interurban company was refused, but it was the consensus of opinion of the Board that the company would have no trouble in securing right of way from property owners along the roads with little or no cost, because of the fact that they would immediately see the benefits to accrue from the building of the road.

Kissimmee Valley Gazette.

"SEE FLORIDA FIRST"

A State Oldest in White Settlement and Newest and Best in Modern Development.

A State with a Rare Blending of the Old and the New.

A State Where the Products of the Temperate Zone and the Sub-Tropics Meet on Common Ground and Intermingling Reach Their Highest Estate.

A State Abounding in Assets of Pure Air, Good Water, Generous Sunshine, Ample Rainfall, and Twelve Full Months in Each Year to Grow Grain, Grass, Root and Fruit Crops and Live Stock.

A State with the Gentle and Healing Winds Bearing Balsam from the Pines and Salt Air from the Seas.

A State Fast Becoming the All-Year Round Playground, Health resort and Income Producing Region of the Nation.

A State to Which the World is Invited to Come and Study and Enjoy by Staying, Prolong Life and Comfort.

By W. A. McRAE, Commissioner of Agriculture.

The funeral service was held at the family residence on Liberty Street Wednesday afternoon, July 12, at 4 o'clock. — Tribune-Republic, Meadville, Pa.

Story of Mrs. F. E. Caldwell's Life Reads Like a Romance

Mrs. F. E. Caldwell, member of a royal family, and for forty years a resident of Papillion, until a few years ago, died in that city Saturday morning at the home of her daughter, Mrs. E. Nickerson, wife of County Attorney Nickerson of Sarpy County. The funeral will be held Monday afternoon, 3 o'clock, at the Nickerson home. Surviving Mrs. Caldwell are her husband, F. E. Caldwell, and the following children: Mrs. John Speedie, Benson; H. D. Patterson, County Surveyor, Sarpy County; W. E. Patterson, Lincoln; Mrs. E. S. Nickerson, Papillion, Mrs.

Forgets Language.
Mrs. Caldwell was a Brazilian and when she first came to Papillion could speak practically no English.
(Continued on page 8)

The Lake Worth Herald, in an interview with a man from Ritta, in the Everglades, tells of the success that has attended the introduction of the avocado culture in that section. "I wish you could see the four-year-old trees on George Walker's place," said the man to the Herald reporter. "They are more than fifteen feet high and loaded with fruit."

At the Vreeland Nursery on Wisconsin Avenue there is an avocado tree that was planted before the departure of the late J. T. Bearse from St. Cloud that is today over fifteen feet in height and it is bearing this year for the first time, having some twenty-nine good well-shaped fruits. This tree is only five years old. It has hitherto been thought that a light frost would injure these trees, but they seem to thrive in this city.

Hon. A. E. Donegan has recently purchased the stock in the Kissimmee Cattle Company owned by Walter C. Bass and Mr. Bass has purchased from Mr. Donegan several parcels of real estate in Kissimmee, Tampa and Jacksonville. This deal is one of the largest that has been consummated in this section for several months.

St. Cloud is proud of its beautiful Lake Tohopekalgia and the distant shore always kept us longing for the time when we might have some easy means to reach it. It will afford great pleasure to all who live here, and those who come to us every winter, to know we have a fine lake motor boat. The first picnic was not

only enjoyable to every one, but it was a great surprise, on landing at the beautiful grove, to find a spot so exquisite, such beautiful trees and shade, with a shelter for the diners, and later on so much more will be added for the comfort of those who wish to spend the day there. The boat itself is comfortable, and, al-

FINDS CHANGE BENEFICIAL

We are in receipt of a letter from Mrs. C. B. Hughes, dated from Fountain City, Tenn., where she is located for the summer. She informs us that she has struck another Wonders City, but not in the same sense as St. Cloud. "I came here hoping the change would benefit me," she says. "I am happy and feeling fine. Mr. Hughes is also feeling much better. We think of returning to St. Cloud September 1. Please send my papers as we are very anxious to hear how the dear people of our loved city are getting along."

Mrs. Lahrman and her daughter of DeLand are raising a large quantity of squabs for which they find a ready sale. These squabs at four to six weeks old weigh eight ounces or better each and sell for about fifty cents per pair dressed. There are about 700 pigeons in their yards and from two to four dozen squabs are ready for the market each week.

In St. Cloud we find no one who is engaged in this business, though

from figures it should prove very profitable. Several people have pigeons that they allow to fly around town to the great annoyance of citizens who have tanks for rain water. If good airy yards were built for these pigeons they would be a source of good income instead of a nuisance. At present they are nesting in gutters and round private buildings and they are not only a nuisance but extremely unsanitary.

Proposition to Use County Road Gang on the Highway May Preclude the Necessity of Voting Another Special Bond Issue

When the district was created a bond issue of \$150,000 was voted for the purpose of building a sand asphalt road from the canal on the road between Kissimmee and St. Cloud to the county line, together with a spur to Narcoossee. This comprises some thirty-eight miles of road. When the specifications were prepared and bids requested it was found that the bidders asked from \$75,000 to \$100,000 more for the work than the amount of the bonds. The law provides that the roads specified

Mrs. J. A. Nelson, who left St. Cloud to visit her daughter in Oklahoma, writes in a letter descriptive of the rough climate that she had experienced since her arrival in that State. She then went to Kansas, where so many want to farm. She says: "They think that farm life is an independent life, but I don't. They call getting up at four every morning and working until ten at night, working six days a week, and sometimes adding a seventh independence. I do not and I cannot see what they have for their work. They have not had any rain for three weeks and there is none in sight and the sun almost cooks one when one goes out in it. I do not want any more of sunny Kansas. St. Cloud is good enough for me. I expect to see the smiling faces of my friends soon."

**Visible in St. Cloud Last Friday
Under Favorable Conditions**

The lunar eclipse arrived on schedule time last Friday night, the moon entering the shadow exactly at 9:59 p. m., Eastern standard time, and entirely emerging at 1:12 a. m. At the moment of contact with the earth's shadow, and for some minutes thereafter, there was no difference in the appearance of the moon, except that it gradually lost part of its brightness, while retaining its circular shape. The eclipse was visible in St. Cloud and the weather here was favorable for observation and many observed the phenomenon during its various stages. The average distance of the moon from the earth is about 230,000 miles.

Among the most delightful events of Thursday last was a social arranged for the enjoyment and sociability of the members of the class by Rev. and Mrs. J. B. Santee at their hospitable residence, corner Ohio Avenue and Tenth Street, and many of them availed themselves of accepting the invitation, renewing acquaintances and making new friends. Appetizing refreshments, consisting of lemonade, melons and cake, were served before the guests departed, thanking their teacher for his kind remembrance of them. Rev. and Mrs. Santee are excellent entertainers and take pardonable pride in their class.

Lynn is always looking after the welfare and pleasures of our visitors and on this occasion ran out his Oldtown canoe and took a couple of visitors to see how good the fishing was in this vicinity and incidentally ran the boat up the Runnymede canal. When they reached the lily pad bed the minnows, probably taking the boat for a big fish, jumped from under the weeds and about a dozen dropped in the boat. The ladies had often heard that there were snakes swimming in the lakes and were much excited, but have come to the conclusion that fishing must be good in this section.

Mr. Josh H. Ferguson, popularly known as "Uncle Josh," representing H. C. Stanford Co. in St. Cloud, left over the A. C. L. last Monday morning for St. Petersburg and Pass-a-Grille. He expects to be away one week and before coming back he will try his luck in tarpon fishing.

FLORIDA COAST IS DOTTED WITH RESORT BEACHES

Nowhere in the United States Can You Find
a More Pleasurable Winter Playground
and Summer Swimming Beach

Not the least wonderful thing about Florida is her beaches.

More and more we are coming to realize in all seriousness that Florida is the finest summer resort in the world.

At one time people far away from here did not know more than to think it was hot—unbearably hot in Florida in the summer.

One has only to live here the year 'round to disprove such a theory.

The State, being a peninsula, is swept by ocean breezes.

Along her wonderful beaches it is a perfect paradise in summer.

The breeze off the ocean fans your cheek night and day and the cooling waters invite you to come and take a dip. The bathing is perfectly safe, too, which cannot be said of many other beaches.

For sure-enough bliss give an early morning dip in the surf, ere yet the sun has come out strong. Just at day-break is the time when the air is full of the salty tang and you feel as happy as a fish.

Along the smooth sandy beach you run in your bathing suit and your toes just wiggle for joy as they anticipate

coming in contact with the cooling waters.

Further and further out you go and forget dull care and a world of sordid things. You are a mermaid or a mermaid, as the case may be, for the time being, and you splash around in the biggest bath-tub in the world to your heart's content.

Far in the East the day is breaking and the Sun sends his long golden beams athwart the waters to warm them up a bit, for when you cut in the waters were—ugh-o-o-o—so chilly they made your teeth chatter.

This is the life! This is! All business cares forgot you are a little brother to the fish and a child of Neptune. The world can go hang for all you care. You have your ocean, why should you fret?

What was it said Florida was hot? Somebody who did not know what he was talking about. It is mid-June and you are so cold you must get out and run up and down the beach to keep warm.

Florida—a winter playground and a summer swimming pool.—Melbourne Times.

pect of getting it in commercial quantities in the Philippines.

This article might be produced there in large quantities. In the absence of any system or regularity the amount now produced is small. The trees thrive in all parts of the islands, but those who cultivate them are not in a position to produce more than enough papain to supply local drug stores.

A COTTON SUMMER.

Grace Margaret Gould, in the Woman's Home Companion for June, says that cotton is going to be distinctly fashionable.

"It's surely a cotton summer—and why shouldn't it be? The cottons themselves are the answer. They are flower strewn, and flower branded; they are lace inserted and hand embroidered. As for the striped cottons, they are a beautiful exhibit in themselves. The stripes are no longer

pale toned and narrow, but brilliant, broad and decidedly conspicuous. That is, when the stripes are silk. In contrast are lovely sheer cottons, with stripes of lace or pale-toned vines of flowers.

"Then, for the trimmings of the new cottons, so artistic and unusual are they that they have quite changed the use of the frock of cotton. Today it is a rival of the silk gown and used for many of the same occasions, except, perhaps, very formal ones."

AUTO TAKES AIR ROUTE.

A party of four persons in an automobile was recently carried through the air 225 feet above the surface by means of an aerial cableway over the Elephant Butte dam.

Hope this was not our tonsorial artist, Bert Baxter, who ate his dinner on that dam July 4, 1916.

WARNING OF INFANTILE PARALYSIS GIVEN BY U. S. HEALTH SERVICE

What not to do to aid in checking infantile paralysis, according to the Federal Public Health Service.

Don't kiss and fondle children if either they or you have been exposed.

Don't cough, sneeze or expectorate without using a handkerchief to retain possible germs.

Don't let your children attend school if the disease exists in your community.

Don't neglect to summon the doctor if any member of the family develops the slightest suspicious symptoms.

Don't use common drinking cups or towels or public drinking fountains.

Don't attend public meetings in communities where the disease is reported.

BELLADONNA FARM.

English Chemist's Experiment in New Industry.

Mr. Beetham Wilson, an analytical chemist of Dorking, England, has started a new chemical industry to take trade from the Germans.

The drug atropine, obtained from belladonna (the deadly night shade), is now exceedingly scarce. Before the war it was \$5.00 an ounce. It is now quoted at \$16.00, and only one-eighth ounce supplies can be ordered. The cultivation of belladonna has been practically a German monopoly. Nearly all of it came from Wurtemberg, whence one grower alone exported 30,000 pounds to England every year.

Directly the war began Mr. Wilson made experimental plantings and sowings of locally obtained wild roots and their seeds. He has now over 3,000 belladonna plants in three separate plots. They are extremely slow growing, and those in the ground since September, 1914, are only a few inches high. The plants become commercially profitable in four years, when they can be cut twice in a good season.

British belladonna yields more atropine than the German. When the crops are established there is little hard labor, and belladonna growing, says Mr. Wilson, would be an ideal "old man's occupation."

The soil some places round St. Cloud would be eminently suitable for the culture of this plant, which is certainly a profitable industry.

CITY HAS FLY-CATCHER.

Redlands, Calif., Has Novel Municipal Office.

When A. E. Chapman, an inventor, offered his first patent fly-trap for sale in Redlands, California, he didn't have the least idea that he was taking the first step in creating a new city office, the only one of the kind in the entire country, says the July Popular Science Monthly.

With the invention of his new death-trap for flies came the new official position of city fly-catcher. Chapman, the inventor, was appointed at a salary of \$10 a week, the office being in existence nine months each year. Chapman began work by placing scores of traps at street intersections, around restaurants and in the rear of livery stables.

The bait placed in the traps was fresh canned fruit, syrup, sugared water, sprinkled with cinnamon, watermelon, or fresh meats. The flies crowded into the cages—and to their deaths.

The carcasses of the flies are removed each morning by the official fly-catcher. He decided that he would estimate their number by enumerating them in units of liquid measure. During the first year between 240 and 242 gallons were gathered on the basis of 50,000 to 75,000 carcasses to the gallon. Taking an average of 60,000 to the gallon, between 14,400,000 and 14,700,000 were coaxed to their deaths in a year.

ADVERTISE IN THE TRIBUNE

FLORIDA FRUITS DECLARED BEST AND MOST LUSCIOUS

Early Vegetables and Fruits Find a Ready
Market in the Far West Because
Of Unexcelled Quality

Florida products in the way of tomatoes and citrus fruits are far ahead of those grown in California is the statement made recently by Theo. F. Ahrens of Denver, Colo.

Mr. Ahrens had just finished cleaning up a tour of the tomato fields throughout Florida and according to him the products of the Florida soil are far more in demand in the West even as far as Oregon, than those of California.

"The growers in Florida," said Mr. Ahrens, "are beginning to learn that they have just as fine, if not a better market in the West for their tomatoes as they have in the East. I have just succeeded cleaning up my tomato business and succeeded in getting about all there were down on the East Coast."

"The thing that has pleased my customers was that they were paid on the spot, their crops yielding them an average of at least \$1.40 per crate, this being the fancy. Heretofore they haven't got freight out of their shipments. Of course, choice tomatoes do not bring quite so much, for there is not such a demand for them."

Ahrens was asked how the Florida tomato compares with those grown in the North and East.

"There is no comparison to be made, for the Florida product cannot be excelled. That you may know just what they are thought of in the West, I have just shipped sixty cars, besides other odd cars heretofore."

"How the Florida citrus fruits compare with the Florida products?"

"The Florida fruits," answered Mr. Ahrens, "have the California fruit beat in every way. The reason is simply because the California fruit has no taste or juice, while that of Florida has a peculiar flavor and lusciousness of its own that can be found in no other."

"Another thing," continued Mr. Ahrens, "the people are being educated throughout the country to the fact that those delicious avocado pears are grown in Florida and they are coming into greater demand. Your early vegetables, such as eggplant, Irish potatoes, celery, young onions, lettuce and radishes, all find a ready market, and I am introducing your okra into the West."

"I'm now on my way home," concluded Mr. Ahrens, "but be assured, I shall be back here in plenty of time for next season's tomato business."—Oklaehobee Call.

FLORIDA HEALTH TRAIN COMMENDED FAVORABLY BY THE MEDICAL JOURNAL

The functions and benefits of the "health train" in Florida are commended upon in part as follows in The Medical Record:

"The State Health Department of Florida, although unable to fill entirely adequately all the functions normal to a body of that sort, owing to certain handicaps, according to the public health records for June 2, has undertaken very successfully the dissemination of information regarding health matters to the general public, and is carrying out the idea in a manner which might well be emulated by other States. The Florida laws authorize the board to disseminate information concerning the cause, na-

ture and extent of communicable disease by lectures, exhibits and printed matter. They also provide for a train containing health exhibits, which travels about the State, educating the people. This train carries lecturers and is conveyed free by the railroads."

PAPAIN INDUSTRY URGED.

Philippines Spurred to Develop Industry Likely to Be Profitable.

The State Department has been informed that efforts are being made in the Philippine Islands to induce the Bureau of Education, or some other branch of the Government, to take up the project of working out a system by which papain shall be produced in commercial quantities, collected and prepared for export through some central point.

Papain is the proteid compound resembling the trypsin of the pancreatic juice that is contained in the milk of the pawpaw fruit. Many inquiries have been received from the United States for papain for the trade, but there is no present pros-

DO YOU KNOW THAT—

Heavy eating, like heavy drinking, shortens life?

The registration of sickness is even more important than the registration of deaths?

The United States Public Health Service co-operates with State and local authorities to improve rural sanitation?

The gallant Brady had been fighting heroically and had only seven cartridges left in his ammunition belt when killed. The battle had been underway but fifteen minutes when Brady fell.

A. J. Nye of Orlando is shipping oranges and grapefruit from that place. The fruit was kept in a pre-cooling plant and is being shipped in pre-cooling refrigerator cars and is bringing high prices.

Bartow has voted a \$20,000 bond issue for the improvement of Sumnerlin Institute.

DO YOU KNOW THAT—

Cor. Penn. Ave. and Tenth St. **F. D. Moshier** Osceola County, St. Cloud, Fla.SWEET POTATO VARIETIES
SHOULD NOT BE MIXED

All varieties of sweet potatoes do not mature at the same time. Farmers who have not had enough vines to plant their crop have been in the habit of obtaining additional ones from their neighbors. Frequently they mix varieties and as a result the potatoes do not mature at the same time.

Some will not be mature at digging time and as a result they will spoil in storage. C. K. McQuarrie, State agent of the University of Florida Extension Division, reminds farmers that there is a great loss in storage every year from immature potatoes. Furthermore, the potatoes cannot be standardized as long as varieties are mixed. If vines must be obtained from different sources, they should all be of the same variety.

SORE-HEAD MAY BE
PREVENTED IN CHICKS

Sore-head usually gives trouble to poultrymen during summer. It is prevalent during the rainy season on late hatched chicks. The disease is due to small parasites which cause swelling and irritation of the head. The eyes become inflamed and sore and the chicks finally die.

The best means of control is prevention, according to A. P. Spencer, district agent for the University of Florida Extension Division. If one

waits until the disease appears he will have considerable trouble and probably will lose a number of chicks. As soon as the chicks are strong and active, epsom salts should be given in the feed or water. A half pound of epsom salts can be added either to enough wet mash feed for fifty chicks and fed three times a day or to three gallons of water which can be kept before the birds constantly. Enough permanganate of potash should be added to the water to color it. The chicks seem to prefer colored water to fresh. It is probable that the salts will be more effective if given in the feed.

Local treatment should be applied as soon as the disease appears. W. L. Floyd of the University of Florida College of Agriculture has found the following prescription effective: Lard, 2 ounces; powdered copper sulphate, 1 ounce; table salt, 1 ounce; crude carbolic acid, a few drops. This remedy is severe, but effective. None of the mixture should be allowed to get into the chick's eyes.

If the heads are sore and badly swollen it is advisable to wash them in warm water containing a little crude carbolic acid before the ointment is applied. In severe cases the chick should be destroyed.

The Kissimmee Citrus Growers' Association has purchased the Waters & Carson packing house and will immediately remodel it and equip it with new and modern machinery.

B. E. EVANS IS AGAIN NAMED COUNTY AGENT.

County Commissioners Decide to Continue Farm Demonstration Work in Conjunction With U. S. Department of Agriculture And Appropriate \$1,200.

B. E. Evans, who for the past two years has been in charge of the farm demonstration work in Osceola County, was re-employed for the ensuing year at the meeting of the County Commissioners held last week, says the Kissimmee Valley Gazette.

The County Board decided to continue the work in connection with the United States Department of Agriculture. The department appropriates the sum of \$600 annually for the work and the county agreed to supplement this amount with an appropriation of \$1,200, the agent to pay his own expenses and transportation.

Mr. Evans has accomplished considerable in the way of agricultural work in the county and his advice is freely sought by those engaged in farming.

Mr. Evans is now making plans to use a stereopticon lantern with slides to illustrate farming methods in a series of lectures which he will give in the various sections of the county during the coming fall and winter.

FUTURE FOR GRAPE GROWING IN STATE

Specimens of Pasco Product—Woods of Dade City Shows Fine Means Monopoly for Florida.

That Florida can enjoy an absolute monopoly in grapes for at least two months of the year, this State being able to produce fruit in June, while California cannot do so before August, and other States before late July, is the claim of I. A. Woods of Dade City. Mr. Woods, at the instigation of the industrial department of the Seaboard Air Line, has been investigating grape prospects in Pasco

County, and is convinced that this State can make in grapes a big money crop and one in which it would be entirely without competition for June and July of each year.

Mr. Woods has exhibited samples of Concord and other grapes grown in Pasco County which are of unusually fine quality. The only ripe grapes in the United States are now to be found in Florida.

EXPERIMENT STATION
ISSUES ANNUAL REPORT

The annual report of the University of Florida Experiment Station has just been issued. This report covers the work done by the Station during the fiscal year ending June 30, 1915. It contains the report of the Director, Animal Industrialist, Plant Physiologist, Entomologist, Plant Pathologist, assistant Plant Pathologist, Chemist and assistant Botanist.

The progress of the work which has continued from previous years and new work is given. The principal work of the Station has been with dairy and pork production, feeding experiments, fertilizer experiments with field crops and citrus trees and seedlings, plant diseases, insect pests, bacterial and fungus diseases, and plant breeding.

CLOGGED DITCHES
FLOOD THE LAND

Ditches through flat woods land will need close attention during the rainy season. Crops on such land will not be damaged if the water is removed immediately, but if the ditches become clogged with weeds and trash so that the water stands they may be ruined or damaged seriously. Farmers usually forget about the ditches after the crop is laid by. That is when weeds and grass grow tallest. Ditches will become clogged in a short time.

A. P. Spencer, district agent for the University of Florida Extension Division, recommends that the ditches be cultivated as long as possible. This will keep them open, so that the water will be removed immediately. In case of heavy rains it will be advisable to watch flat woods land closely. Corn will show the effects of water-logged land in about two days. Other crops are also sensitive to an excess. If the water does not drain away immediately, the ditches should be examined.

SWEET POTATOES SHOULD
BE STAPLE CROP

If there is a strip of land that has escaped a crop up to date, plant sweet potatoes. Sweet potatoes have been delayed this year on account of the spring drouth. Some farmers failed to obtain draws and vines and others became discouraged and planted their land to some other crop. As a result it is probable that there will be a good demand for sweet potatoes this fall.

There is usually a good market for sweet potatoes. They are a staple crop and those which are not consumed for human food can be fed to pigs. According to C. K. McQuarrie, farmers have not found sweet potatoes profitable hog feed at thirty-five cents, as a rule, but that depends on the price of other feeds. However, if the market price of potatoes drops below thirty-five cents the pigs afford a profitable market.

The West Indian yam and the other coarse fleshed varieties will be found best for stock food if the potatoes are to be grown primarily for animals.

HOME GROWN SEED
CORN IS THE BEST

The best seed corn for a given community is produced in that community. It has become adapted to the soil and climatic conditions and will make better yields than seed brought from a distance. Corn is a plant of extremely domestic habits and it requires several years for it to become acclimated.

Farmers should not be misled by stories of large yields from other States. It will be well to try new varieties on a test plot, but it is not advisable to depend on new seed for the entire crop. It may be that the new variety will be better than the old after it has been grown in that particular community several genera-

tions, but except in rare cases will it do better until it has become adapted.

C. K. McQuarrie, State agent for the University of Florida Extension Division, urges farmers to select their seed corn from their own fields. If they have not a good variety they should at least obtain seed in the neighborhood. Seed should be selected in the field by all means. Without seed selection the strain will deteriorate. Improvement cannot be had by crib selection. The number of ears on the stalk, the size of ears, quality and yield can be improved in a few years by systematic field selection.

Florida stands today at the threshold of boundless opportunity for development and advancement along every line. Her resources are limitless—and we have but "scratched the surface." With the development of her rich farming land, her mineral resources, her growing livestock industry and her unsurpassed citrus industry, she is destined to take her place as one of the greatest, if not the greatest State in the Union.

Co-operative effort in the selling of fruit is as essential as in fighting battles or in putting out fires. Indiscriminate selling is guerilla warfare and might be likened also to a city that would allow private companies to organize departments to put out fires at so much per. The alarm rings, they all rush to the spot, and begin to cut prices with the house owner; in the meantime, while they are wrangling, the house burns down.

Work has commenced on the hard surfacing of the roads between Sydney and Dover, in Hillsborough County.

Extensive deposits of the finest grades of sienna that is known to paint manufacturers has recently been discovered in Dade County. There is said to be about 25,000 tons in the deposit that have been uncovered.

Two thousand head of cattle were dipped last week at the Partin Ranch in Osceola County.

Marion County is proposing a bond issue for \$950,000 for good roads purposes.

The stockmen at Shingle Creek, Osceola County, have arranged for a community dipping vat to be erected at once in that locality.

Subscribe for The Tribune.

PLANT COWPEAS IN
JULY FOR HAY

There is no better hay than good cowpea hay. Folks hear a great deal about alfalfa these days, but if cowpeas are cut at just the right stage and properly handled they make just as good hay as alfalfa.

The greatest trouble with cowpea hay is curing. This is especially true in Florida during the rainy season, and it is during the rainy season that the Florida farmer wants to raise cowpeas. But if they are sown during July they will mature in the fall when there is not so much danger from rain, because the rainy season will have passed.

John M. Scott, animal industrialist to the University of Florida Experiment Station, recommends that cowpeas be planted in rows from 24 to 30 inches apart. This will require about half a bushel of seed to the acre. One or two cultivations should be given. Among the best varieties are brabham and iron.

The peas will not only furnish hay, but they will protect and enrich the land during summer.

ONLY INERTIA PREVENTS.

Commenting upon the fact that ten million roses were used in Portland, Ore., rose festival recently, the Clearwater Sun remarks that ten million and many more roses could be blooming in Florida every day if the people took the trouble to plant the rose bushes and give them a little care. Florida is the home of flowers and they grow with ease and in profusion when planted and given the smallest care. Roses bloom the year around in most parts of the State, and they are and always will be the queen of the flowers.—Times-Union.

FARMERS BUILDING SILOS.

Florida farmers are building silos. That statement does not apply to small sections, but to practically the whole State from Wauchula and Fort Pierce to Pensacola. The Extension Division of the University of Florida has been keeping records of the number built. Last year a special agent was sent out to give demonstrations and to aid farmers who wished to build silos.

Now farmers are building silos and not talking much. Extension workers occasionally find silos of which there are no records. C. L. Willoughby, Professor of Animal Husbandry in the College of Agriculture, estimates that fifty silos will be built in the State this year. This will bring the total number close to two hundred.

FLORIDA
CITRUS EXCHANGE

For seven years the Florida Citrus Exchange has been on the firing line for the protection of the citrus growers of the State. No movement for their good has failed to have its support; most of these have originated in its ranks.

The Exchange has been a vital factor in the general progress and upbuilding of Florida, directly and indirectly. The future of Florida depends largely upon the prosperity of her citrus industry. The Exchange offers a sane and tried solution of its marketing problems. You can help by joining now.

Stayers' Sale

Every summer we have put on a sale for the benefit of those who stay here through all the year, and to help us keep busy during the dull season.

Every one knows that hardware prices are steadily advancing but for all that we are going to offer you a discount of 10 per cent from our regular prices on everything but fencing and white lead.

This sale gives any one that needs them a splendid chance to buy refrigerators, ice boxes, cream freezers, or oil stoves at a very low price. Also any one needing sash, doors, roofing, paints, etc.

This offer holds good only during July.

ST. CLOUD TRIBUNE

Published Every Thursday by St. Cloud Tribune Company

Entered as Second-class Mail Matter, April 28, 1910, at the Postoffice at St. Cloud, Florida, under the Act of Congress of March 3, 1879.

The Tribune is published every Thursday and mailed to any part of the United States, postage free, for \$1.50 a year, 75c six months, or 50c three months—strictly in advance.

Reading notices in local column 10 cents a line. Rates for display advertising furnished on application.

Advertising bills are payable on the first of each month. Parties not known to us will be required to pay in advance.

Important Notice!

In sending in your subscription, always state whether renewal or new subscriber.

In renewing from another postoffice, give former address.

In changing your address, be sure and give former address.

SUBSCRIPTION, PAYABLE IN ADVANCE, \$1.50 A YEAR

News of the Week

The infantile paralysis situation in the North has somewhat improved, though it is reported that there have been a good many deaths, but the rate per thousand has decreased.

After a good deal of controversy the Deutschland submarine has been declared a merchantman and has been permitted to unload its cargo of dyes, etc., and is at the time of writing, reloaded and ready for the return trip. Secrecy is being kept as to the time of sailing and after the vessel is cleared by the port authorities she may be missing at any moment.

The State Supreme Court on the 17th inst. denied the writ of prohibition asked for by the Rev. Sydney J. Catts against Circuit Judge Simmons of Duval County and ordered an alternative writ of mandamus issued in the case of W. V. Knott vs. Canvassing Board and Inspectors and Clerks in Putnam County. This order means that the recount asked for in Duval County will be allowed.

The advent of a large number of sharks in Northern resort waters and the loss of several lives has caused a panic among bathers and local authorities are offering rewards for the killing of these monsters. The United States Government is also taking the matter up and an appropriation will probably be made by Congress to assist in the destruction of the man-eaters. Large schools are also reported in the Gulf of Mexico and are in such numbers as to seriously interfere with the fishing industry, many of the fleet having returned to port without any catch, as fishing was not considered profitable under the circumstances.

The European war goes on with increasing violence. However, the tide seems to have turned all round in favor of the Allies. The latest returns show that the Russian advance continues without abatement and that the Austrians in that section, assisted by the Germans, are falling back. The Italians on their side continue to harass the Central European armies and are also claiming large gains. In the extreme West both the French and English are fighting very valiantly and the land that has been captured by the latter during the past two days fighting has been of the utmost strategic importance. The

Clippings From Our Exchanges

One of our exchanges has a long editorial on "What the Mexicans Need," when all it should have said was "a licking."—Florida Times-Union.

Florida will get nearly a million dollars of the Federal Government's appropriation for good roads. Florida counties have spent ten millions and Uncle Sam's million will add to the total.—Tampa Tribune.

If the wilds of Africa can produce any such mess of a road as there is between Okeechobee and the grade on the Okeechobee-Fort Pierce highway, we have never heard of it. If the County Commissioners can't give us a road, for the love of Mike, make it a canal and be done with it.—Okeechobee Call.

We note in the St. Cloud Tribune the death in that city of Mrs. Maude A. Guessaz, wife of Mr. Louis A. Guessaz, linotype operator on The Tribune. Mr. and Mrs. Guessaz and their little son for a time were residents of this city, he having held a position with the Herald, and they made a large number of friends who sympathize with the bereaved husband and son.—Bradenton Herald.

The cost of printing paper has risen so high as to drive many newspapers out of business and imposes a grievous burden on all the rest. It used to be an axiom in the newspaper world that the subscription price just about paid for the white paper used. Today the price at which most news-

Turks have been again defeated by the Russians, and in the matter of the African-German colonies the Belgians and English have shown considerable gains.

In the Mexican situation matters do not seem to have changed much. The Villa and Carranza factions are still squabbling among themselves without much advantage on either side. Meanwhile the old policy of watchful waiting is being maintained, but the National Guard is still being sent to the border. There are now approximately 100,000 members of the National Guard on the frontier and some 50,000 regulars either in Mexico or on the boundary. The Second Regiment, Florida National Guard, has not yet gone to the front, but is being prepared to leave at any moment. Meanwhile the regiment has been overhauled and some twenty-nine men out of Kissimmee's Company B have been returned to their homes for sundry and various reasons. Mexican matters, at any rate for the present, show a temporary lull, and the prospect for any war with Carranza has for the time being been minimized.

The hurricane on the East Coast during the past week caused a great deal of damage. The land around Baltimore, in North Carolina, the home that was built at the expense of millions of dollars by the late W. K. Vanderbilt, suffered to the extent of many thousands of dollars, the whole vicinity being covered with water from three to five feet deep. At the same time the United States collier Hector was wrecked off the coast of South Carolina, but fortunately the crew and the marines, numbering 142 all told, were taken off with but little accident. The vessel is broken in two, but will probably be salvaged. Communication with the North, both as regards the mail and passenger service, has been very seriously impeded. Many bridges were swept away on all the railroads running to the South.

The hurricane season has come on us extremely early this year. It does not generally commence until well into the month of August. The interior of the State seems to be singularly free from these storms. They either take the East or West shores and the interior of Florida suffers no inconvenience.

Papers are sold doesn't come anywhere near paying for the paper in them. The cost of paper has nearly doubled. Many papers which made a fair profit a year or two ago are now published at a loss, for this reason alone, and yet many subscribers are grouchy about paying their subscription—and some won't pay at all.—Bartow Record.

The Largo Sentinel tells of a visit from men who are greatly interested in the planting of camphor trees and are looking about to plant other aces and get others interested in the raising of camphor trees as a business. The concern which the visitors represented proposes to install a plant for distilling the gum and handling the commercial side of the project, provided there are a sufficient number of people interested to take up the serious culture of the camphor tree. "The camphor tree grows luxuriantly in Pinellas County and the proposition is worth investigating," declares the Sentinel, "for there is an abundant acreage in this county which might be utilized for the purpose." That there is money in the project cannot be doubted, for the demand for camphor is steady and will never slacken. It is largely used in the manufacture of celluloid, which is now employed for making a million things useful and ornamental, as well as necessary in the manufacture of high explosives, and for which there is a growing demand.—Florida Times-Union.

ADVERTISE IN THE TRIBUNE

EDITOR'S MAIL BOX

BY OUR READERS

July 11, 1916.

My Dear Friend Washburn:

I and family are here and mighty sorry we are. We were freezing in a cold rain for two weeks and now we are in a heat that knocks Florida silly. The nights are hot and sultry. I tried to keep cool down on the dock on the lake front, but the mosquitoes soon drove me in. They have had so much rain this spring that the sloughs, marshes and lakes are full, and you know what that means for mosquitoes. It means that the sufferer ought to be full, too, in order not to feel their stings.

From what I can hear and read Minnesota and the Dakotas are going to have a heavy and bumper crop of small grain, but as usual the corn and potato crops are going to be short, heavy and continuous rains causing the slump. We are now paying \$1.20 per bushel for old potatoes and new ones are ten cents a pound. Flour here in the wheat country, where we can see elevators and mills in all directions, every little town having one or more, is now selling to the consumer at \$4.10 the 98-lb. sack—

that is at the rate of \$8.20 the barrel. Those are the prices we paid during the Civil War, when there were not twenty-five flour mills in Minnesota, and none in the Dakotas, and at the present time many of the elevators are full of wheat. I was in the mill at Crookston and the boss told me that flour would go still higher on account of the war. Every little trouble they take advantage of.

It really does one good to see the beautiful fat sleek-looking cattle grazing in the meadows and pastures in grass six and eight inches high—great big Holsteins giving eighteen to twenty quarts a day, and the sleek little yellow Jerseys with their udders full of milk.

Well, I am drinking two quarts of rich pure milk every day and it seems to do me good.

Mrs. Bircher joins me in sending our kindest regards to you and Mrs. W., hoping that you and her are all enjoying the best of health. We wish you a cool comfortable summer, free of mosquitoes, and all other good things.

Believe me your sincere friend,

W. BIRCHER.

WONDERFUL VETERAN IN ST. CLOUD

Never in Hospital, Never Excused and Never Hit Is His Record

Mr. W. S. Weatherston has recently purchased the three lots on Block 126, north of the Presbyterian Church, and will commence the erection of a modern residence at once. Mr. Weatherston is one of those enterprising citizens who realize the benefit that St. Cloud has been to him, although he has only spent one winter here

and we wish there were many more like him. Comrade Weatherston is a Veteran of the Civil War, having enlisted in Troop K, Sixth New York Cavalry, September 5, 1861, and was discharged August 25, 1865. He was never in the hospital and never was excused from a fight and his regiment has credit for being in 143 engagements. The Sixth New York Cavalry and the Sixth Virginia Cavalry exchanged shots that brought on the Battle of Gettysburg. Mr. Weatherston was the youngest and smallest boy in the troop, enlisting when he was a few days over seventeen years of age. Out of 17 members who left New York State with the troop, there were but eleven who received their discharge at Elmira, N. Y., of whom six had been wounded. Mr. Weatherston was one of the five who had not been hit. He was first sergeant of his troop. He knows that war is hell and he is hoping and praying to put out the fires of hell.

Allies Captured Wildwood Grove Tuesday

The two Sabbath School classes—"The Golden Rule Girls," Mrs. Northup's fine class of girls, taken care of in her absence by Miss Wilson, and "The Yoke Fellows," Rev. N. W. Beauchamp's class of as fine "bunch" to turn out, met Tuesday afternoon.

The lovely boat Maud was chartered and the boys and girls sailed the lake for the beautiful Wildwood Grove on the other shore. On arriving the party found the grounds had been greatly improved, and the new provisions for the comfort and accommodations of the picnickers had taken on attractive features since the last trip by the comrades and comradeses a few weeks previous, for Captain D. C. Cope is leaving nothing undone to make it the place of resort, and while this party were having the time of their lives, the Captain and his genial Mate, Warren Comstock, with some assistance from our auto transfer man, Clarence Bailey, were leisurely adding attractions.

Tables, seats, already there, are being reinforced by swings, etc. A splendid well has been put down, adding much to the visitors' health and comfort.

Among those who trod the "gang plank" on and off the boat were Misses Vera M. Hargrave, Kathleen M. Goff, Ruth L. Blech, Eleanor E. West, Evadna Harris, Beattie Parr, Mary B. O'Hara, Messrs. Floyd L. Northup, M. C. George (the cooling live wire ice boy), Otto Blech, Gordon Northup, Van Ricketts, Maurice Johnson, J. H. Phipps and Clarence Bailey.

The marshalled hosts were chaperoned by the Rev. and Mrs. Beauchamp, and a finer lot of young folks seldom get together, and if there was one who did not have a good time to the limit, it had not been found out when the party were called back to the waiting Maud by the toot of the whistle.

Of course, the young ladies were equal to the emergency, and at 6 o'clock dinner the tables were luxuriantly decorated with the best viands the city of St. Cloud could produce, but one of the difficulties was to buy the boys till the delicacies were spread.

First entering the grove, a song or two were sung and a little Scripture quoted, followed by prayer against harm, danger, wrong acts or indulgences, and then "Young America" was turned loose, and no strings on

them, and they made the welkin ring with merriment.

As an evidence no cigarettes were among the gents, when they were ready for the marshmallow roast, they had to go to the boat for matches to light the bonfire. And this part was sure a time.

Row-boating, swinging, rope jumping, in which some were experts, tree climbing, baseball (with native ball and native balls), was not the least of the activity. No accidents to mar the happiness, though Phipps received a lacerated finger in the process of opening a can, and Miss Vera a lacerated hose at the ankle, by a rude vine and ugly briar. However, her hair was still its color when all was adjusted.

Floyd got so full of the last batch of lemonade the girls had made that he thought they must have watered it extra to make him feel so funny.

One of the features chanced to be the happy day for Miss Eleanor and the girls and boys together reminded her of this Sweet Sixteenth.

COME AGAIN.

EARL NIGHWSWONGER BETTER—STILL USES CRUTCHES

In a letter from Mrs. Nighswonger we learn that her son Earl continues to improve, but that he can only get around on crutches. He has finished his first month at business college, but still has to attend the doctor's office for treatment. Mrs. Nighswonger thus concludes her letter: "All we need to complete our happiness is for him to lay aside his crutches and we will be able to get back to St. Cloud and our friends there, who have so kindly interested themselves in us through these long months of anguish and suffering."

"ROSEDALE" ENLIVENED BY WATERMELON PARTY

Mrs. H. W. Dale entertained a lot of her lady friends at her residence—"Rosedale"—on the 12th inst. This occasion was christened a pink and white melon party, though the melons were all beautifully ripe and red. Those present were Mesdames G. W. Daugherty, William Phipps, A. Harmon, J. W. Meek, H. W. Ilman, M. A. Tuttle, L. L. Kibbe, Lida Mosher, C. Brown, W. Harris and daughter, William Kasbohm, L. J. Peterson, Mrs. Veeder and Mrs. J. O. Vreeland and the Misses Eva Allen and Eda C. Eppe. The afternoon

CALENDAR

OF

CHURCHES :: CLUBS :: SECRET SOCIETIES

CHURCHES

M. E. Church

Sunday school at 9:30; sermon at 10:30; Junior League at 2 p. m.; Class for Bible study at 3 p. m. Epworth League at 6 p. m.; sermon at 7 p. m.; Prayer meeting every Wednesday evening at 7 p. m. Rev. Geo. H. Northrop, pastor.

First Presbyterian Church.

Sunday school at 9:30 a. m.; preaching at 10:30 a. m. and 7:30 p. m.; Christian Endeavor at 6:30 p. m.; prayer meeting on Wednesday at 7:30 p. m. Silas Cooke, Pastor.

First Baptist Church.

Sunday school at 9:30 a. m.; preaching at 10:30; B. Y. P. U. at 6 p. m.; preaching at 7 p. m.; prayer service Wednesday night at 7 o'clock; Ladies Aid first Friday of the month at 2:30 p. m.; Mission Study class second Friday of the month at 2:30 p. m. John Melmaker, pastor.

Episcopal Church

Morning service every Sunday morning at 10:30, at the Episcopal Guild Hall.

L. D. Frost, Lay Reader.

First Christian Church

Bible school at 9:30 a. m.; preaching at 10:30 a. m. and 7 p. m.; Junior Endeavor 3:30 p. m.; Christian Endeavor 6 p. m.; prayer meeting 7 p. m.; Wednesday evenings.

Christian Science Society

The Christian Science Society holds services every Sunday morning at 10:30 o'clock, also every Wednesday evening at 7 o'clock at their church, corner Minnesota Ave. and Eleventh street. All are welcome. Mrs. Amelia K. Robinson, First Reader.

Seventh Day Adventist

Kentucky avenue, between Eleventh and Twelfth streets; Sabbath school every Saturday at 9:30 a. m. sharp. Church service at 10:30 a. m.

Open Air Services

Religious services are held every Saturday evening in Oak Grove Park at 7 p. m. Everybody is cordially invited.

CLUBS

Ladies' Improvement Club

The Ladies' Improvement Club meets regularly the 1st and 3rd Wednesday of each month, at 2 p. m., at their hall, corner of Florida avenue and Tenth street.

Episcopal Guild

Meets the 1st and 3rd Thursday at 2:30, in the Guild Hall, on Florida avenue. President, Mrs. L. D. Frost; Vice President, Mrs. Norris; Secretary, Mrs. Clara Sims; Treasurer, Mrs. L. H. Mallett; Directresses, Mrs. W. B. Rush, Mrs. Davis, Mrs. Mary Reynolds, Miss Wainwright.

M. E. Ladies Aid.

The Ladies Aid of the M. E. Church meets every 2nd and 4th Tuesday at 2 p. m., at the homes of the members or with friends of the church. Refreshments are always served. A cordial invitation is extended to ladies who are sojourning in our city to meet with us.

Flora Cox, Pres.

Ruth Kenney, Sec.

Phebie Depew, Treas.

was a most jolly one, as any one can tell who has ever enjoyed the hospitality of Mrs. Dale. There was plenty of music, both classical and otherwise, and a cabaret, during which Mrs. Veeder posed for a picture as Della-Ta B So and her papoose Mi Co Mi Con. Mrs. Veeder wore her Indian costume, made out of palmetto and worn by her at the Fourth of July celebration. The other ladies were taken in a group on the front porch of Rosedale cottage, Mr. Nicholas being the photographer. The ladies all had a glorious time, so they say and are looking forward to another one.

BIRTHDAY PARTY.

Yesterday Comrade A. A. Martin celebrated his seventy-second birthday and on this occasion Mrs. Martin entertained a good bunch of her friends to ice cream and cake. Some twenty-five or thirty gathered to wish him many happy returns of the day. Mr. Martin is a member of the drum corps and played several snappy airs to enliven the occasion. He will leave the first of the week for an eastern hospital in the hope that it will benefit his health. Mr. Martin has been for a number of years a photographer and he finds that as years roll on the chemicals take effect on his system and he has been more or less of an invalid for a long while. We trust that his trip will do him good and that he will return to us in the best of health.

Mrs. Ackies Bass left yesterday for Whittier to meet her husband, who is assisting in the drive of 1,500 head of his recently purchased stock of cattle. They both returned last night.

St. Cloud Gun Club

St. Cloud Gun Club holds its regular weekly shoot on Thursday afternoon, at 2 o'clock, on their grounds on the lake front, between Michigan and Virginia avenues.

W. C. T. U.

W. C. T. U. meets the 1st and 3rd Monday of each month at the First Baptist Church, at 2:30 p. m.

Ladies' Aid and Missionary of Presbyterian Church.

The Ladies' Aid and Missionary of the First Presbyterian church of St. Cloud meet at the church (unless otherwise announced) on the second Friday of each month, at 2:30 p. m. All ladies of the congregation and visiting ladies of the city are cordially invited to attend these meetings. Elizabeth B. Bartlett, Pres. Sarah F. Glenn, Secretary. Carrie M. Bardwell, Treas.

SECRET SOCIETIES

Rebekah Lodge No. 13.

Benevolent Rebekah Lodge No. 13 meets on the 2nd and 4th Monday evening in each month. Visiting Rebekahs cordially invited to meet with us.

W. O. W. Lynn Camp No. 399.

Meets every Friday, at 7:30 p. m., Odd Fellows' Hall. T. A. Summers, C. C. Jas. Sage, Clerk.

St. Cloud Eastern Star

St. Cloud Eastern Star meets regularly the first and third Thursday of each month, at 7:30.

Post Meetings

L. L. Mitchell Post No. 34, G. A. R., St. Cloud, Fla., meets every Friday at 2 p. m.; all visiting comrades of the G. A. R. are cordially invited to meet with us.

W. H. Smith, Commander.

D. H. Gill, Adjutant.

St. Cloud F. & A. M.

St. Cloud F. & A. M. meets regularly the 2nd and 4th Friday evening of each month, at 7:30.

Army and Navy Union

St. Cloud Garrison No. 141, Army and Navy Union, meets every 1st and 3rd Monday in each month at Masonic Hall.

A. M. Doughty, Commander.

J. G. Hill, Adjutant.

Woman's Relief Corps

L. L. Mitchell Relief Corps No. 12, Department of Florida, will meet the 2nd and 4th Thursday of each month at 2 p. m. Visitors are always welcome.

Auxiliary A. and N. U.

The Elsie P. McRoy Auxiliary Camp No. 17, will meet in the Masonic rooms, 2nd and 4th Monday of each month at 2 p. m. Mary P. Doughty, Lady Commander; Mrs. J. W. Francher, Lady Adjutant.

M. W. of A.

The M. W. of A. meet every first and third Monday night at 7:30, at the Masonic Hall, corner of Tenth street and Pennsylvania avenue. Frank Walton, secretary.

The Ohio Association

Meets every second Wednesday in each month at the G. A. R. Hall, at 2 p. m., unless agreed, with due notice, to meet at 10 o'clock a. m. for a banquet.

S. F. Naylor, Pres. A. S. Cole, Sec.

New York Veteran's Association.

The New York Veterans' Association meets the first Tuesday of each month in the I. O. O. F. Hall, at 2 p. m. L. W. Francher, Pres.

Woodmen Circle Osceola Grove

No. 186

Woodmen Circle, Osceola Grove No. 186, of St. Cloud, meets every 2nd and 4th Thursday night of each month, in the I. O. O. F. Hall, at 7:30 o'clock. All visiting members are cordially invited.

Elizabeth Nighswonger, Clerk.

Mother Bickerdike Tent No. 1, Daughters of Veterans.

Meet first and third Tuesdays at 2:30 p. m. in G. A. R. Hall. Miss Clara Reynolds, Pres. Miss Jane Warner, Sec.

Magnolia Camp No. 7793, Royal Neighbors of America

Meet every second and fourth Tuesdays in Masonic Hall, corner Pennsylvania ave. and Tenth street, at 7:30 p. m. Visiting Neighbors welcome.

New England Association

Will meet the second Tuesday of each month at 2:30 p. m. in upper G. A. R. Hall.

J. R. Warner, Sec.

St. Cloud Public Library

The St. Cloud Public Library, corner of Florida avenue and Tenth street, is open to the public Tuesday and Saturday afternoons, from 2 to 4:30 p. m. under auspices of the Ladies' Improvement Club.

Mrs. C. K. Hendricks, Pres.

Notice to Associations

When an association wishes to use Oak Grove Park for the purpose of having a picnic, before the announcement is made be sure to confer with the chairman of the committee.

ST. CLOUDLETS

LOCAL PERSONAL SOCIAL

Fire insurance, taxes, A. E. Drought.

Fred B. Kenney surprised his wife with a new house upon her return.

C. C. Coffee of Jacksonville was here this week on a business trip.

We are sorry to learn that Mrs. Dr. Kloos is quite ill at her residence on Dakota Avenue South.

Woman's Relief Corps Sale continues until Saturday night at Durham's Department Store. 47-11

We are pleased to see that Mr. Lydius Nighawonger has recovered his health and that he is once more in attendance at the Palm Theatre.

Mrs. Fred B. Kenney and two children returned last week from a two months' visit in Illinois and Ohio. She says they are mighty glad to get home.

Mr. Joe E. Johnston has been appointed County Highway Engineer, his bid for this work having been the lowest. He is to receive 2 1/2 per cent on contract prices.

Mr. W. Burke, who has been ill for a long time, left St. Cloud on Tuesday last for St. Louis, Mo. Mr. Burke is a son of Comrade Burke, who died here a short time ago.

Cast your eye on our weekly program, on page five, at top of sixth column. 38-11

Mrs. P. D. Marine and daughter Frances were among A. C. L. passengers Monday morning, they going to Maudie, La., for a six weeks' visit with relatives and friends.

Judge E. Dayton French, who has had temporary apartments at "Fort Dodge," the home of Mr. and Mrs. Charles B. Dodge, until his new home at Ashton was built, moved out there this week.

Mrs. Helen Bailey and baby returned from New York on Monday last. They came on the Comanche and report that they had a very rough passage along the coast and especially so off Hatteras.

Mrs. L. U. Zimmerman left last Thursday for a two months' visit with relatives in Pennsylvania, returning some time in September. Her genial face will be missed at the Zimmerman Store.

Mr. and Mrs. J. O. Vreeland were on Thursday last the guests of Mr. and Mrs. Nichols and Mrs. Dale and took an auto trip to Alligator Lake and vicinity. The trip was very much enjoyed as the weather was ideal.

Many bargains still being offered at Durham's Department Store by the ladies of the Relief Corps. 47-11

Mrs. D. H. Riggan and son Harvey left Altapass, N. C., and have gone to Newport, Tenn. Both are improved in health and enjoying themselves. Harvey will return in about a month, but Mrs. Riggan will remain till late in the fall.

Do you know that the most beautiful view of the lake is from the "Wentworth Cottage," and it costs only \$2.00 per week for a room with double bed, use of porches, fish poles and everything needed for comfort and pleasure. 47-11

Mr. Clarence Bailey informs us that he has a surplus of melons on his farm, five miles from town, and that the public are welcome to go down there and help themselves. His farm is on the road to the Goblet place beyond Old Peggorn.

I. B. Sawyer and Mrs. Sawyer arrived this week from Pasadena, Calif. After a short stay at the Bonair House they rented a bungalow and will remain here some months to see if they like Florida as well as their former home in the Golden West.

Monday is "Hazards of Helen" day, the great railroad series, featuring Helen Gibson. 47-11

S. W. Porter, real estate, insurance.

Mr. and Mrs. E. R. Wetherbee, Mr. and Mrs. Martin and a party will take a trip across the lake on the Maud this afternoon.

A. B. Johnson of Orlando, who is connected with the Florida Citrus Exchange, and L. A. Hakes of Winter Park were here the early part of the week. Mr. Johnson is very confident that Orlando will be made the headquarters for the citrus exchange.

Don't forget the W. R. C. will continue sale of all goods until Saturday night at Durham's Department Store. 47-11

Mrs. Ollie Harris, who has been visiting friends and relatives in Kentucky for the past several weeks, is expected home today. Miss Mittie May will leave on her arrival for Atlanta, Ga., to spend some time with her other sister, Miss Melissa May.

Mr. James M. Johnston, who has served for a number of years as deputy clerk of the court for Osceola County, has resigned his position. He has accepted a position with Hon. Arthur E. Dungan and will look after the extensive property interests of Mr. Dungan.

Miss Mary O'Hara of Watertown, N. Y., who is visiting with her grandfather, sang a solo at the Methodist Church on Sunday morning. It was that sweet hymn, "One Sweet Solenn Thought." Miss O'Hara has a good voice and we wish she was a permanent resident of our city.

Residents have commenced to take notice of the "clearing lot ordinance" and we notice that several lots have been freed from palmetto and other noxious growth. The city duds will now probably have the grass cut on the streets within the prescribed limits, which would also add greatly to the looks of the place.

Mrs. William Murray and sons, William and Howard, arrived here from Brooklyn, N. Y., on Monday last and will remain for several weeks. They are staying with Mrs. Murray's father, Comrade C. A. Robinson. They came down from New York on the steamer Lenape and put into Charleston to get out of the hurricane.

Mr. and Mrs. F. C. Conard are back with us again. They left St. Cloud about two months ago for points in Virginia and Illinois on a pleasure trip. Mr. Conard is, we are sorry to say, rather weak, but very anxious to get back to the Wonder City, and he says that he has made his last trip North and that St. Cloud is good enough for him.

Terminating a two weeks' vacation among the Carolina pines, Mac Arrowsmith returned Friday. He spent the glorious Fourth with Dr. L. C. Riddle at the latter's home in Balentine, S. C., after which he left for Biltmore, N. C., to enjoy the balance of his furlough. Mr. Arrowsmith resumed his duties at the postoffice Monday morning.

Mr. J. D. Alexander, formerly of Company H, Forty-third Indiana Infantry, who has been living in Florida for the past three years, has come to St. Cloud and is at present making his home at the Bonair House. Mr. Alexander has been a trusted employee of the express company on the Pennsylvania lines for over forty years. He is very well pleased with the Wonder City.

Captain Charles Cisco, who has been in St. Cloud for several years, left yesterday morning for Yakima County, Washington, to remain awhile with his son. Captain Cisco is an old sea-dog, having spent fifty-three years of his life on the water and traveled twice around the world. His stories of sea life have entertained many of our young folks, and old ones, too, since he came to us. We wish the captain good-bye and a speedy return to our town.

Mr. Samuel Rodgers, in sending us a renewal of his subscription, says: "Wife and myself have spent three very pleasant winters in the Wonder City and have formed the acquaintance of many old comrades and friends, and we enjoy hearing from them and the prosperity of the Wonder City."

Mr. and Mrs. Jake Stevens and Miss May Pettis motored over to Orange Center on Sunday last to spend the day with Mrs. William Shuck. Mrs. Shuck was formerly Miss Iris Oliver and was one of the teachers in our school. Jake let his grays take a rest this time and they rode out with Mr. Coble in his new Maxvell. If any one has an idea that it was not a jolly crowd and that they did not have a good time, let them ask Miss May to unfold that camera and they will be convinced of the contrary.

The latest feature in movies—the Selig Tribune. It is a newspaper of pictures from all over the world. Every Tuesday at Palm Theatre.

Mrs. Lucy E. Vanderpool of Big Springs, Texas, arrived in town on Monday last. She had a very hard trip and was forced to wait eight days in New Orleans, owing to the storm and the destruction of the railroad communications. She was obliged to get a permit changing her route, and came through Montgomery finally, instead of the regular Tallahassee route. Mrs. Vanderpool is staying at Mr. Cummings' and seems to be very pleased with St. Cloud and its people. The lady has come here to make her permanent home.

The unusually fine moonlight weather has tempted a good many of our friends who have the good luck to own autos to take moonlight drives to the surrounding places. Last week a party of five took an after-supper trip to Fells Point and everything went well until on their return they arrived at the bridge. The auto pulled up suddenly and the party found themselves on the very edge of the bank and on the verge of a capsize. The good level head of the chauffeur saved the party and they were all glad to get back home.

Umbrella trees wanted. Box 521. 47-11

VETERANS' ASSOCIATION.

The Veterans' Association met in the G. A. R. Hall Saturday afternoon, July 15, 1916.

Meeting was opened with President W. F. Kenney in the chair.

Opening song, "America," followed by prayer by Rev. Brown.

Minutes of last meeting were read and approved as read.

A collection of \$1.75 was taken for the hall.

Edith Harrod, in charge of the social hour, gave the following excellent program:

Song, "On the Banks of the Wabash," by Lee Harrod, and for an encore he gave "They Are on Their Way to Mexico."

Recitation, "The Roll Call," by Mrs. Mariske.

Song, "The Blind Pig," by Constance Harris and Charles Miller, Jr., which pleased so much they were called back.

"The Whippoorwill Song," by Miss Mattie Wilson, who also was called back for a second number.

Recitation, "Telling Them of Tampa," Golda Groves.

Accordion solo, "The Ballroom Favorite," by Mr. Dingle, and for a second number he gave the "Evergreen Waltz."

Ruby Yeatman recited very nicely. Songs by Ed DePew, Edith Harrod, Lillian Mayes, Bertha McClellan and Otis Bass—"Meerschmum Pipe" and "Paddle Your Own Canoe."

Song, "When You Were a Tulip and I Was a Big Red Rose," by Bertha McClellan, Otis Bass and Lillian Mayes.

Tenor solo, "I've Got a Dog Named Rover," by Lee Harrod, accompanied by Edith Harrod.

Accordion solo, German selection, by Mr. Dingle.

Reading by Frank Kenney.

Closed by singing "Star Spangled Banner."

J. M. Anderson, Secretary.

The climate of St. Cloud is the most perfect in the world.

RATH'S HOUSE

ONE OF FINE SHOW PLACES

What Owner Has Accomplished Can Be Duplicated By Others

Comrade Ferdinand Rath certainly has a fine home on Ohio Avenue and a visitor to his residence on July 4th tells us that he is also an able decorator, for his decorations on that day were as good as the very best in town. His flag pole was adorned with an 8x12 flag, while the piazza, which is already beautifully covered with cypress and other vines, was further decorated with two large 6x9 flags. A beautiful silk flag was also used as a background for Mr. Rath's sword and belt. Mr. Rath's house is one of the show places in town and demonstrates very plainly the amount of labor that the gentleman puts in it. The lawns are mowed every few days and are like a floor of velvet. Vines and flowers are everywhere in evidence and even his hen-yards are models for both beauty and cleanliness. Mr. Rath is and always has been since his arrival here one of the boosters of our city and his residence shows clearly that a little hard work for an hour or two a day will work wonders in this soil.

COMRADE JENNINGS MISSES SIMPLE MODE OF LIVING

Comrade Jennings seems to be having a good time at Bridgeport, Conn., but of course is complaining, that the weather is not Florida weather. We did not suppose it was and we really thought that Brother Jennings was cognizant of that fact before he left here. The fact of the matter is, that there is no climate in the world that can compare with Florida, and especially with this section. He is certainly doing good missionary work in his section. He concludes his letter in wishing to be remembered to all his friends, and says: "We will be truly glad to get back and enjoy our little home in St. Cloud, with the daily simplicity of our mode of living."

W. C. T. U.

The W. C. T. U. met in regular session at 2:30 p. m., July 17th, Mrs. Kenney presiding.

Song, "Rescue the Perishing."

Scripture reading, Mrs. Hargrave.

Prayer by Mrs. Depew.

Response to roll call—the name of some Prohibition State.

Minutes of last meeting read and approved.

Reports from committees received and committees discharged. They were given a rising vote of thanks for the duties so faithfully performed.

A rising vote of thanks was also extended to Mrs. Reifschneider for the vehicle for our float; Mr. John Daniels, for his kindness in helping to build the float; to Mr. Morgan, for lumber loaned; to Mr. Ralls, for the use of his auto; and to all others whose names I may have missed, who so kindly and willingly assisted us in preparation for the parade.

We have reason to be proud of the fine appearance of the L. T. Ls as they followed Old Glory.

The leader for the program, Mrs. Garner, being absent, it was made an open meeting, in which all joined.

Subject under discussion, "Labor Organizations Favor Prohibition." "Prohibition's Effect on Revenue and Business" brought out many statements and incidents showing that the two Bs—Business and Booze—do not make a successful combination. Nor do Labor and Intemperance affiliate.

The argument that with the abolishing of the saloons, so many men would be thrown out of employment is proving a delusion, as the demand for more groceries, dry goods, ice cream and things the drinking man could not afford in the days of "booze," necessitate more concerns to handle them, consequently more men will be employed.

The outlook is continually improv-

ing and we confidently expect a dry nation in 1920.

The program closed with a beautiful solo by Miss Ruby Yeatman, with which all were delighted.

Another new name, Mrs. Spencer, was added to our list of members. Quite a number of new members have been received recently, which is encouraging to the comparatively few who remain here through the hot summer months.

The session closed with the W. C. T. U. benediction and will meet again August 7th at 2:30. Everybody welcome. Topic, "Out of Doors With the Children."

LAKE SHORE CLUB.

The club met as usual on Thursday last and a social supper was the main entertainment of the evening. The members, of whom there were a large number present, had an aquatic meet and bathing was the grand attraction.

The ladies brought with them baskets loaded with all kinds of good "eats" and a swell supper was enjoyed. The landlady, Mrs. Van Denbergh, cooked up the coffee, while Mrs. Edd George made the banana sherbet, and after Harry Todd and Roy Van Denbergh washed up all the dishes the club adjourned to meet again next Thursday.

One young lady, who has lived in St. Cloud for several years, was overheard to remark, "Never had a better time in my life."

We are pleased to learn that this club is prospering and wish it every success.

When a merchant advertises goods to be of a specified grade, or quality, he stakes the store's good name on the truth of his claims?

Comrade Bullard Hale at the 72nd Milestone

On Thursday, July 13th, a jolly party gathered at the home of Comrade J. F. Bullard, it being the occasion of his seventy-second birthday, and at the same time the anniversary of his wedding. All present enjoyed the day immensely, as Comrade Bullard has a beautiful home, with many shady cool nooks, where one can sit

round under the umbrella trees on grass softer than a velvet carpet. Brother Bullard's house fronts on the lake, where one can see across it for from six to twelve miles. We saw the excursion boat Maud, crowded with passengers, about three miles off shore, and many smaller boats with pleasure-seekers taking advantage of the Thursday half-holiday.

All present enjoyed every minute of their stay, some playing croquet on the lawn, some singing and having other amusements. Mrs. Bullard, with her assistants, served an ample supply of delicious refreshments.

Mr. Bullard is Past Commander of this great State of Florida, and also had the honor to be one of the guards who guarded Jeff Davis and assisted in the capture of the Confederate President.

This jolly crowd returned to their homes with lighter hearts, hoping to meet Brother Bullard again annually until he attains his one hundredth anniversary and the writer of this expects to be present, for one. All declared it was a day to be long remembered. One Who Was There.

Mr. and Mrs. W. H. Hulbert, who have been spending several weeks in Denver, Colo., write us that the weather is dry and hot and that they are looking forward with great pleasure to the fall, when they will return to St. Cloud. Mr. Hulbert thinks that there is no place and no climate like that of the Wonder City.

Comrades E. DePew and W. B. Lynch will leave on Monday next for Johnson City, Tenn., for a change of climate, as they are both in poor health. They think that a few months spent a little further North will be of some benefit to them.

The real estate market will be "dull" most of the time if you try to sell property without the help of the Tribune's advertising?

An advertisement in the Tribune pays a hundred per cent on the investment.

FOREIGN TRADE RECORD SMASHED

Exports for the Fiscal Year Totalled \$6,525,000,000.

The country's foreign trade during the fiscal year ending with last month reached a total of \$6,525,000,000, exceeding by many millions all previous records, according to preliminary figures announced by the Treasury Department at Washington, D. C. Exports were valued at \$4,345,000,000 and imports at \$2,180,000,000. The figures are based on complete returns for the first eleven months of the year and estimates for June.

The war munitions trade was the predominating factor in establishing the new export records. The steel exports jumped from \$226,000,000 in the previous fiscal year to \$618,000,000 and explosives from \$41,000,000 to \$173,000,000. In 1914 the explosives exports amounted to only \$6,000,000. Raw cotton exported during the fiscal year was valued at \$370,000,000, compared to \$376,000,000 the year previous.

GERMAN CASUALTIES

TOTAL 3,012,637

London Says These Figures Are Announced in the Official List.

German casualties from the beginning of the war to the end of June, as computed from official German lists, are given as 3,012,637, in an official statement made public in London. The announcement is as follows:

"German casualties reported in German official casualty list, exclusive of corrections, in the month of June: Died of wounds and sickness, 18,585; prisoners and missing, 6,279; wounded, 63,187; total, 88,051.

"These, added to those reported in previous months, and including corrections reported in June, 1916, bring the totals reported in German official lists since the beginning of the war to: Died of wounds and sickness, 757,327; prisoners and missing, 342,673; wounded, 1,912,637; total, 3,012,637.

"These figures include all German nationalities — Prussians, Bavarians, Saxons and Wurttembergers. They do not include naval casualties or casualties of colonial troops. They are not an estimate by the British authorities, but merely casualties announced in German official lists.

President Wilson's term at noon of March 4 and the inauguration of his successor at noon of March 5th.

A Middle West newspaper that was opposed to the mail order houses offered an automobile as a prize to the person who would send in the greatest number of mail order catalogues in a given time. The result was that enough catalogues were sold for junk to more than pay for the machine. The country storekeeper could take a hint from this, recognizing catalogues as being worth so much in trade.

LYMAN IN JAIL TO SERVE HIS SENTENCE

Has Eighteen Months to Put in at Federal Prison at Atlanta.

Dr. John Grant Lyman was taken from New York July 12th to the Federal prison at Atlanta to serve a sentence of eighteen months for using the mails to defraud customers of a brokerage firm he conducted in New York City under the name of John H. Putnam & Co.

Bankruptcy proceedings had kept Lyman in the Tombs prison several weeks. After the completion of the term in Atlanta he will be taken to California to serve a sentence of fifteen months for the operation of a Panama land swindling scheme.

Lyman was arrested at St. Petersburg, Fla., some months ago, being traced there from Tampa. He had much cash in his possession.

PITTSBURGH'S LITTLE GERMAN BAND NO MORE

The European War Took All But One of Its Members.

The "little German band" of Pittsburgh, Pa., is no more. When the war broke out its eight members joined the German navy. Seven have been killed in action. The sole survivor, Herman Koedel, a member of the German merchant submarine Deutschland's crew, has just written to Captain of Detectives Archibald Mackrell of Pittsburgh, telling of the deaths of his seven comrades. Koedel writes that after being disabled in the naval service he entered the merchant marine and is now attached to the Deutschland.

SQUEEZE THREE LAMPS INTO ONE

If you could combine three old fashioned carbon lamps into one, you would get only the same amount of light as you may now obtain from a single SUNBEAM

National MAZDA Lamp and this clear, cheerful light burns for the cost of one carbon lamp. It will cost but little to equip your home throughout with these lamps today.

How Pineapple Juice and Pepsin Relieves Stomach Trouble

The juice of pineapples contains ferments used by the stomach in the digestion of food. Pepsin is supplied by every stomach, but many times in insufficient quantities. These two, when combined with the other ingredients in Natol Pineapple Pepsin Compound furnish to the stomach exactly the right proportion to digest the food. Strong laxatives are an injury and are not needed where the food is properly digested.

Natol Pineapple Pepsin Compound is not a patent medicine but a corrective and assistant in overcoming all stomach troubles. One bottle (50c) is usually enough to give permanent relief. All druggists and Seminole Pharmacy. 47-1

FLORIDA LEADS DIXIE
THE HIGHWAY STATES

In Road Construction, Asserts Secretary Gilbreath.

No State of the eight traversed by the Dixie Highway has made greater progress in construction of this great North and South thoroughfare and feeder roads than the State of Florida, according to W. S. Gilbreath, field secretary of the Dixie Highway Association, who has just completed a tour of the State. When it is taken into consideration that the good roads revival throughout the State grew out of the competition for the routing of the Dixie Highway in the early part of 1915, what has been accomplished is little short of miraculous. This desire to build the Dixie Highway has not been confined to the resort, or highly developed counties, but exists in practically every county, no matter how thinly populated it may be or what its resources are. Within less than a year \$8,000,000 has been voted in bonds, and \$4,000,000 more to be voted upon within the next ninety days. Of this amount \$5,112,000 has been voted in counties traversed by the highway, with \$3,200,000 to be voted on.

MANY REGIMENTS OF
WORKERS INJURED

Sixty-one regiments of workers were wounded in the industries of Pennsylvania during the first five months of 1916. More men than would complete one-half the enrollment of a war strength regiment were killed during the same period.

That declaration was made by Commissioner John Price Jackson of the Department of Labor and Industry of Pennsylvania, who presented data compiled by the bureau of statistics and information of the Department of Labor, indicating that 954 workers had been killed in Pennsylvania industries between January 1 and June 1, 1916, and 100,287 others injured. The total of killed and wounded reaches 101,241.

"Counting approximately 1,600 men to a regiment on a war strength footing in the United States army, one can realize that the same number of fatalities as occurred in Pennsylvania's mines and factories during the first five months of this year would annihilate more than half a regiment," said Commissioner Jackson.

"The workers injured outnumber the entire regular army of the United States. If every man of the regular army, along the Mexican border, had received a wound in battle the aggregate number of wounded would not equal the roster of those wounded in the mills of Pennsylvania during the first 152 days of this year. An average of 191 workers were killed every month during the first five months of the year and an average of 20,248 were injured each month. This terrible loss can be greatly reduced by both employer and employees."

One hundred and forty-nine workers were killed in January, 227 in February and 251 in March, according to a classification of fatal accidents made in the Labor Department. The remainder of the fatalities, occurring in April and May, are not being classified.

A complete compilation of the fatal accidents for the first three months of the year, by counties, nature of injury, social condition of victim and county in which the fatality occurred, has also been compiled and will be published in the July issue of the monthly bulletin of Pennsylvania's Department of Labor.

THE AUTOMOBILE TRAILER.

The automobile trailer is the newest big adjunct to farm efficiency, says American Farming. It protects the automobile from the abuse of overloading, scratching, soiling and similar injury, and makes the automobile more efficient by permitting it to do double duty. The trailer has been tried out and found to be practical and necessary for the highest efficiency and has therefore come to stay. There are fifty makes already on the market and hundreds of farmers are investigating and buying.

OVER-EATING.

Some one has rather aptly said that "one-third of what we eat enables us to live and the other two-thirds provides a living for the doctors," says a writer in Farm and Home. And undoubtedly over-eating, quite as much as improper foods, is responsible for many of our bodily ills; for all that is eaten over that required to nourish our bodies and furnish the necessary energy, overtaxes the organs of digestion and elimination, prematurely wearing out the human engine, just as too much fuel more quickly burns out a furnace or the kitchen range.

An advertisement in the Tribune pays a hundred per cent on the investment.

PROCLAMATION

CALLING FOR ELECTION FOR
BONDING THE CITY, TUES-
DAY, SEPTEMBER 5, 1916.

WHEREAS the Council of the City of St. Cloud, Florida, at its regular session held July 10th, 1916, passed an Ordinance which has been approved by the Mayor, authorizing the Mayor to call a special election for the City of St. Cloud, to be held for the purpose of submitting to the electors of said City for approval or rejection the issuance of bonds of the City of St. Cloud, Florida, in the aggregate sum of One Hundred and Fourteen Thousand Dollars to be issued for the purposes hereinafter specified.

NOW, THEREFORE, I, J. I. Cummings, Acting Mayor of the City of St. Cloud, Florida, under and by the authority vested in me by Chapter 7237 of the Laws of Florida, approved June 1, 1915, and the Ordinance of the City of St. Cloud, Florida, passed July 10th, 1916, do hereby call a special election for the City of St. Cloud, Florida, to be held

TUESDAY, SEPTEMBER 5TH,
1916,

for the purpose of submitting to the

NEW MARCONI INVENTION.

Mr. Marconi has, it was stated at the June meeting of the Marconi Company, invented a very simple apparatus, to be worked from the bridge of a ship, which will prevent all danger of collisions at sea in darkness or fog.

When you make up your mind to use nothing but good printing, you make a big jump forward in your business?

LEGAL ADVERTISEMENTS

electors of said City for approval or rejection the issuance of bonds of said City of St. Cloud, in the following amounts and for the following purposes:

(1) \$72,000.00 for the construction of a complete water works plant and system.

(2) \$21,000.00 for sanitary sewer and sewer disposal plant.

(3) \$15,000.00 for the grading, paving, draining and curbing of the following streets:

(a) New York Avenue, forty feet wide from the South side of the Atlantic Coast Line Railroad South to the South side of Eleventh Street.

(b) Pennsylvania Avenue, forty feet wide from the South side of the Atlantic Coast Line Railroad South to the South side of Eleventh Street.

(c) Tenth Street twenty-six feet wide from the West side of Massachusetts Avenue to the East side of Florida Avenue.

(d) Eleventh Street, twenty-six feet wide from the west side of Massachusetts Avenue to the East side of Florida Avenue.

(4) \$4,000.00 for refunding outstanding notes.

(5) \$2,000.00 for sinking fund.

Only resident electors otherwise qualified, who shall also own real estate within the corporate limits, and who shall have paid taxes thereon for the year when taxes were last due shall be entitled to vote in said election.

For the purpose of holding said election I hereby appoint the following Inspectors:

John Anderson,
J. B. Harris,
Lynn Daugherty.

At the election herein provided for there shall be elected three bond trustees whose duty shall be to negotiate all bonds issued under this act, to keep safely the moneys arising from the sale thereof, and to pay them out on city warrants issued for the purposes aforesaid, and designate the fund on which they are drawn. The candidate for bond trustee receiving the highest number of votes cast shall serve until his successor is chosen and qualified at the regular city election in 1919, and thereafter his successor shall serve for a term of three years. The candidate for bond trustee receiving the second highest number of votes cast shall serve until his successor is chosen and qualified at the regular city election in 1917, and thereafter his successor shall serve for a term of three years. Parties desiring to become candidates for trustee may qualify as such candidates in the manner now provided for candidates for city offices of the said City of St. Cloud.

IN WITNESS WHEREOF, I have hereunto set my hand and caused to be affixed hereto the corporate seal of the City of St. Cloud, Florida, this 14th day of July, A. D. 1916.

J. I. CUMMINGS,
Acting Mayor of the City of St. Cloud.

Attest: FRED B. KENNEY,

City Clerk.

47-51

AN ORDINANCE

An Ordinance Providing for the Issuance by the Mayor and City Council of Bonds for the Purpose of Construction of a Water Works Plant, a Sanitary Sewer and Sewer Disposal Plant, and Grading, Paving, Draining and Curbing Certain Streets, for a Sinking Fund, and the Calling of a Special Election for the Approval or Rejection of the Issuance of Said Bonds by the Electors of St. Cloud, Florida.

Be it Ordained by the City Council of St. Cloud, Florida:

Section 1. The Mayor and Council of the City of St. Cloud, Florida, subject to the provisions of Sections 2 and 3 of this Ordinance, are hereby authorized to issue bonds of said City under the seal of the Corporation in the amounts and for the purposes herein specified; said bonds to be signed by the Mayor and attested by the Clerk, with interest coupons attached, which shall be signed in like manner:

(a) \$72,000.00 for the construction of a complete water works plant and system.

(b) \$21,000.00 for sanitary sewer and sewer disposal plant.

(c) \$15,000.00 for the grading, paving, draining and curbing of the following streets:

(1) New York Avenue, forty feet wide from the South side of the Atlantic Coast Line Railroad South to the South side of Eleventh Street.

(2) Pennsylvania Avenue, forty feet wide from the South side of the Atlantic Coast Line Railroad South

LEGAL ADVERTISEMENTS

to the South side of Eleventh Street.

(3) Tenth Street, twenty-six feet wide from the West side of Massachusetts Avenue to the East side of Florida Avenue.

(4) Eleventh Street, twenty-six feet wide from the West side of Massachusetts Avenue to the East side of Florida Avenue.

(d) \$4,000.00 for refunding outstanding notes.

(e) \$2,000.00 for sinking fund.

Section 2. The Mayor shall, as soon as practicable after the passage and approval of this Ordinance, issue his proclamation calling a special election for the City of St. Cloud to be held not less than thirty days from the date of said proclamation, for the purpose of submitting to the electors of said town the approval or rejection of the issuance of the bonds provided for in Section 1 of this Ordinance.

Section 3. The Mayor shall in his proclamation calling the election herein provided, name three electors of the town of St. Cloud who shall act as Inspectors of said election. Should any of the Inspectors so appointed fail or refuse to qualify the Mayor shall be authorized at any time prior to the opening of the polls to name additional Inspectors. The Inspectors conducting the election aforesaid, shall immediately after the polls have been closed count the votes for and against the different proposed items for issuing bonds, and also the votes for the different candidates for Trustees, and immediately certify the result of same to the City Council.

Section 4. At the election to be held, as provided in Sections 2 and 3 of this Ordinance, only resident electors, otherwise qualified, who shall also own real estate within the corporate limits and who shall have paid taxes thereon for the year when taxes were last due, shall be entitled to vote.

Section 5. The bonds issued under the provisions of this Ordinance shall be payable at a rate of interest not exceeding six per cent per annum, payable semi-annually on the first days of January and July, and to be due in not less than one year nor more than thirty years from the date of issuance, as the Council may determine after approval of the issuance of said bonds by the electors, and no bond shall be placed for sale upon the general market until first offered for a period of two months to the citizens and residents of St. Cloud by published notice in the St. Cloud Tribune. The bonds herein provided for shall be sold at not less than par value.

Section 6. At the election for the approval or rejection of the bonds hereinbefore provided for there shall be elected three bond trustees whose duty shall be to negotiate all bonds issued under this act, to keep safely the moneys arising from the sale thereof, and to pay them out on city warrants issued for the purposes aforesaid, and designate the fund on which they are drawn. The candidate for bond trustee receiving the highest number of votes cast shall serve until his successor is chosen and qualified at the regular city election in 1919, and thereafter his successor shall serve for a term of three years. The candidate for bond trustee receiving the second highest number of votes cast shall serve until his successor is chosen and qualified at the regular city election in 1917, and thereafter his successor shall serve for a term of three years. The candidate for bond trustee receiving the third highest number of votes cast shall serve until his successor is chosen and qualified at the regular city election in 1918, and thereafter his successor shall serve for a term of three years.

Section 7. Bond trustees elected as hereinbefore provided shall give official bonds in favor of the City of St. Cloud each in the sum of One Thousand Dollars, conditioned for the faithful performance of their duties. Said bond trustees shall each receive the sum of Ten Dollars per annum as compensation, and shall be required to make their report to the City Council ONCE in each three months.

Section 8. If the result of the election provided for in Section 2 of this Ordinance be against the issuance of bonds for all of the proposed improvements then this Ordinance shall be null and void.

Section 9. This Ordinance shall take effect immediately upon its passage and approval.

Read a first and second time and by unanimous consent read the third time, and passed in open session of the Council, this 10th day of July, A. D. 1916.

J. I. CUMMINGS,

President of the Council pro tem.

Attest: Fred B. Kenney, City Clerk.

Approved this 10th day of July, A. D. 1916.

J. I. CUMMINGS,

Mayor of the City of St. Cloud, Fla.

pro tem.
